

Fullstack Developer (f/m/d)

Berlin, Germany · Engineering

DESCRIPTION

You are a technology nerd, entrepreneurship enthusiast and coder with heart? You have know-how in constructing, maintaining and scaling a Microservice based product? In addition, you are keen to solve current challenges faced by commercial banking? Great, we are looking for YOU!

We are a young, well funded FinTech in the heart of Berlin. Our goal is to help SMEs grow by improving and diversifying their financing opportunities in a smart, tech-driven way.

REQUIREMENTS

Your profile:

- 3+ years of work experience (ideally in a startup environment) as a Frontend or Backend developer, with 1+ years of Fullstack responsibilities.
- Expertise in using & designing REST APIs
- Expertise with modern frontend frameworks. (eg: React 16 & Redux, Angular, CSS modules)
- Familiarity with SQL and NoSQL databases. (eg: PostgreSQL, MongoDB, Elasticsearch)
- Comfortable working in a cloud environment (eg: Docker, AWS)
- You follow the latest technology trends and translate how these can help your team
- Strong decision-making ability and hands-on mentality
- You are a good communicator and enjoy working in a team
- Fluent in English and German is a plus
- At least one hobby next to coding ;)

BENEFITS

We offer you:

- Unique opportunity to shape your own path - We truly look for driven individuals.
- Work in a cross functional environment - got a question? Just ask!
- You will be part of the core team of our young and talented characters at the heart of Berlin
- Fresh Bio fruits, Snacks and Drinks are provided for you
- We regularly go for team lunches and team events, in order to get to know one another outside the office
- You can choose your own work station (Apple or Windows)
- We reimburse your BVG-ticket so you can get to and from work free of charge
- As physical activity is essential in staying active and creative, we subsidize your "Urban Sports Club" membership
