

# Product Manager (m/f) - Berlin

Berlin, Germany · Engineering

## DESCRIPTION

As a professional Product Manager you will be asked to create a Product Technology Team, together with whom you will work on the design improvement, analytics, development, testing and application programming that goes into creating high quality devices and new products. You will be tasked with building core products, from strategy through implementation and deployment and supporting the company continued growth and fulfilling its vision.

## YOUR RESPONSIBILITIES

- Proactively manage the entire features line life cycle from strategic planning to product release and iteration, including the creation of a business model.
- Research and understand customer requirements, operational impacts and needs, competitive offerings, cases from customer support, and translate these into feature specs or product improvements.
- Identify our customers' needs and opportunities through data analysis, interviews, and research through quantitative and qualitative methods.
- Work closely with members from the growth (i.e. sales and customer management), technology and operations teams along with user experience designers to build concepts and requirements.
- Give feedback to designers and engineers.
- Communicate feature releases to internal and external users.
- Weekly measuring of the results and documenting your learning.

## REQUIREMENTS

- You have 3+ years of experience within growth team.
- Software marketing / product management experience.
- Demonstrated success defining and launching excellent products.
- Technical university degree (e.g. Computer Science, Engineering, Math, Physics or similar).
- Past experience in analytics and other digital marketing technologies.
- You have previously set up or want to set up a growth process within a company.
- Radical thinking paired with strong execution.
- Fast learner of new technologies and strategic thinker.
- Comfortable with various data sets and web technologies to visualize new sets of capabilities.
- Speak Russian and English; German can be a plus.
- Previous team work experience in Design Thinking technology.

## BENEFITS

- You get a unique opportunity to shape your own path - we truly look for driven individuals and we want you to grow as fast as possible.
- You grow together with the company.
- You are part of the core team of talented characters at the heart of Berlin.
- Good salary
- You will lead the project from the beginning.
- You will be able to create your own team.
- You will be able to work independently.
- 25 days off.
